

for producers; and training, certification, and quality assurance for professional conservationists. Payments to certified Technical Service Providers will be made only for an application that has been approved for payments.

(d) NRCS retains approval authority over certification of work done by non-NRCS personnel for the purpose of approving EQIP payments.

Subpart B—Contracts and Payments

§ 1466.20 Application for contracts and selecting offers from producers.

(a) Any producer who has eligible land may submit an application for participation in the EQIP. Applications are accepted throughout the year. Producers who are members of a joint operation may file a single application for the joint operation.

(b) The State Conservationist or Designated Conservationist with advice from the State Technical Committee or Local Work Groups will develop a ranking process to prioritize applications for funding which address priority natural resource concerns. The State Conservationist or Designated Conservationist will periodically select for funding the highest ranked applications based on applicant eligibility and the NRCS ranking process. The State Conservationist or Designated Conservationist will rank all applications according to the following factors:

- (1) The degree of cost-effectiveness of the proposed conservation practices,
- (2) The magnitude of the environmental benefits resulting from the treatment of National priorities and the priority natural resource concerns reflecting the level of performance of a conservation practice,
- (3) Treatment of multiple resource concerns,
- (4) Use of conservation practices that provide environmental enhancements for a longer period of time,
- (5) Compliance with Federal, state, local or tribal regulatory requirements concerning soil, water and air quality; wildlife habitat; and ground and surface water conservation, and
- (6) Other locally defined pertinent factors, such as the location of the con-

servation practice, the extent of natural resource degradation, and the degree of cooperation by local producers to achieve environmental improvements.

(c) If the State Conservationist determines that the environmental values of two or more applications for cost-share payments or incentive payments are comparable, the State Conservationist will not assign a higher priority to the application solely because it would present the least cost to the program.

(d) The ranking will not give preferential treatment to applications based on size of the operation.

(e) The ranking will determine which applications will be awarded contracts. The approving authority for EQIP contracts will be the State Conservationist or designee except the approving authority for any EQIP contract greater than \$100,000 is the NRCS Regional Conservationist.

(f) The State Conservationist will make all information regarding priority resources concerns, how the EQIP program is implemented in the state, and the cost-list of eligible practices available to the public.

§ 1466.21 Contract requirements.

(a) In order for a participant to receive cost-share or incentive payments, the participant must enter into a contract agreeing to implement one or more conservation practices. Cost-share payments and incentive payments as well as reimbursement for Technical Service Provider technical assistance may be included in a contract.

(b) An EQIP contract will:

- (1) Identify all conservation practices to be implemented, the timing of practice installation, the operation and maintenance requirements for the practices, and applicable cost-shares and incentive payments allocated to the practices under the contract;
- (2) Be for a minimum duration of one year after completion of the last practice, but not more than 10 years;
- (3) Incorporate all provisions as required by law or statute, including requirements that the participant will:
 - (i) Not implement any practices on the farm or ranch unit under the contract, or agricultural operation of the
